Index

Advanced placement, 128 —
  advantages of, 129, 140
  definition of, 128
  method of Stout study, 130
  qualifying exam, 131, 135
  Stout study, 131
American Industry (course) 60 —
  compared to traditional I.A., 71
  concepts of, 70
  conceptual approach, 65
  definition of, 60
  objectives of, 61
  pilot programs, 71
  structure diagram, 64
Anderson, Donald N., 79
Andrew Hill I.A. team plan, 120
Applied math and science lab, 52

Bateson, W. M., 54
Bennett, Charles A., 49
Body of knowledge, identifying, 46
  58
Botsford, John F., 126
Brainstorming, 75, 78
Brown, Robert D., 48
Bruner, Jerome S., 59, 63

Computer programs, 100
Concept, definition of, 65
Concept formation —
  exercise in, 66
  principles of, 69
Conceptual approach to teaching
  industry, 60, 65
Creative thinking, 73 —
  activities, 75, 77
  definition of, 74
  implications of, 80
  objectives, 75
  psychological safety, freedom, 75

Debrauske, John J., 84
DeVore, Paul W., 56
Discipline, defining an academic, 46
  58

Education —
  definition of, 30
  functions of, 32
  objectives of, 34, 36, 62
Elementary industrial arts, 39
Erickson, Kenneth J., 110, 128

Face, Wesley L., 60
Feirer, John L., 50
Flow charts in school lab, 89, 92
Flug, Eugene R. F., 60
Franklin School team plan, 119
Fryklund, Verne C., 50
Functions of industry approach, 13

Halfin, Harold H., 117
Hand tools, 84
Hofer, Armand G., 98, 104

Industrial arts —
  creative thinking emphasis, 73
  definition of, 31
  elementary, 39
  functions of, 32
  higher education, 42, 110, 128
  junior high school, 40, 84
  mass production, 84
  objectives of, 34, 62, 84, 123
  senior high school, 41
Industrial arts content —
  as applied science, 51
  as groups of industries, 55
  as industrial forces, 57
  as life needs, 47
  as man's cultural needs, 56

Industrial arts content —
  as applied science, 51
  as groups of industries, 55
  as industrial forces, 57
  as life needs, 47
  as man's cultural needs, 56

as math and science problems, 52, 53
as processes and materials, 49, 85, 106
as study of industry, 54, 70, 84
as testing laboratory, 52
emphases, 43, 44, 64, 70, 95, 105
functions of industry, 54
purpose of identification, 58
Industrial forces, 57
Industry —
concepts for team teaching, 121
function of, 54
products and services, 55, 86

Jigs and fixtures, construction principles, 87

Kufahl, Marvin M., 117

Lexington, Mass., team plan, 119

Manual arts, 49
Mass production, 84 —
hand tools, 85
industrial understanding, 84
jig and fixture construction, 87
objectives, 85
outline for activities, 90
personnel, 93
plant layout and routing, 91
project selection, 86
teaching techniques, 89
McMurry, James G., 104
Micheels, William J., 110, 123

Newkirk, Louis V., 48

Olson, Delmar W., 56
Open laboratory, 110 —
advantages of, 115
compared to conventional, 111
Stout study, 113

Pre-Tech Lab, 52
Prichard, Neal W., 84
Processes and materials as content, 50, 85, 106
Programed books, 100
Programed instruction, 98 —
advantages of, 106, 108
branching type, 99
definition of, 99
effectiveness of, 102
industrial arts studies, 103
industrial studies, 102
linear type, 99
materials, 100
military studies, 102
methods of, 99, 101
Prosser, Charles A., 48

Richmond plan, 52
Ruehl, Philip W., 98

San Jose, Calif. I.A. team plan, 120
Scrambled texts, 100
Sommers, Wesley S., 73, 76
Stadt, Ronald W., 57
Stern, Jacob, 54
Stout advanced placement plan, 127
Stout conceptual approach, 60
Stout team plan, 123
Swanson, Robert S., 46, 60

Teaching machines, 100
Team teaching, 117 —
advantages of, 121, 126
definition of, 118
difficulties of, 122, 126
Lexington, Mass. plan, 119
of metals course, 123
organization of, 119
San Jose, Calif. plan, 120
Stout study, 123
Technological life needs, 47
Trump, J. Lloyd, 105

Wall, Gustav S., 13, 29
Warner, William E., 56
